

NEW YORK UNIVERSITY DOCTORAL PROGRAM IN NEURAL SCIENCE *SHANGHAI TRACK*

At NYU, neuroscience graduate education provides integrated training that encompasses molecular, developmental, cellular, system, cognitive, behavioral, and computational approaches to address the most important questions in the field.

Our doctoral training program in neural science builds on the diversity and strength of research across many interrelated departments and multiple campus, especially among the Center for Neural Science, the NYU Neuroscience Institute in the city of New York, and the NYU-ECNU Institute of Brain and Cognitive Science at NYU Shanghai.

Students in the Shanghai track will spend one and half years at NYU in New York for course work and laboratory rotations, before joining a laboratory in Shanghai for thesis research. They will maintain a close tie with New York, and they will receive an NYU Ph.D.

**NYU Doctoral Program in Neural Science
Shanghai Track is **ACCEPTING** applications through
December 1st, 2014**

Applicants interested in applying to the Shanghai track of the Doctoral program in Neural Science should indicate your interest in the Shanghai Track using the pull-down menu in the application.

APPLICATION DEADLINE: December 1st, 2014

To apply, please visit:
